JUST THE FACTS

Most teenagers do not know where to go for anonymous HIV testing.

Teenage girls who drink are more likely to have sex and have it without a condom.

Eating disorders usually start in the teens.

By the year 2030, tobacco likely will be the world's leading cause of death and disability.

Each year in the United States, more than 800,000 teenage girls become pregnant

75% of adolescents with HIV got infected through heterosexual sex between young gay men and young women
